

R'Care

Ergonomic through Innovation

COMPANY INTRODUCTION

We specialise in the design and manufacture of mounting platforms for equipment used in the hospital environment.

OUR 5 RULES OF DESIGN :

EASY to use

EASY to clean

EASY maintenance

EASY future proofing

EASY modular assembly

We strive to provide simple elegant designs to meet the needs of users and the future needs of departments and technology.

All products are tested to meet relevant standard requirements.

CUSTOM / PRODUCT DESIGN

3D CONCEPT

We provide 3D realization of your ideas to help you get a view of the concept. The functionality, usability and modularity of our products can be tested via the prototype designed in accordance with your needs.

PRODUCTION

After the testing phase based on the standards and quality expectations, production starts. Taking account of your budget constraints and constant target, our robust production capacities ensure best-in-class products and reliable delivery.

Medical Power Strip 5 m

Potential Equalization Cable 3 m / 5 m

Potential Equalization Socket

Potential Equalization Pin 15 mm

Potential Equalization Pin 25 mm

OPTIONAL ANTIMICROBIAL COATING BY RESYSTEN

White Titan™ is photocatalytic coating applied to surfaces using a special spraying technology by our technicians.

EFFECTS ON THE ACTIVE TREATED SURFACES ARE:

- Antimicrobial effects on any surface
- Prevention of fungi and mold
- Neutralisation of spores
- Eradication of pathogens due to antibacterial and anti-viral effects
- Purification of air and neutralisation of odors (odors and noxious gases are oxidised into harmless substances)
- Reduction of VOC (Volatile Organic Compound) emissions

RESYSTEN
protective coatings

DESIGNED UPON YOUR NEEDS

At R'Care, our aim is to fulfil your needs and requirements in a cost-effective way. R'Care products can be constantly improved and accessorised to take account of changing demands and environment.
