

OPTIONAL ANTIMICROBIAL COATING BY RESYSTEN

White Titan™ is photocatalytic coating applied to surfaces using a special spraying technology by our technicians.

EFFECTS ON THE ACTIVE TREATED SURFACES ARE:

- Antimicrobial effects on any surface
- Prevention of fungi and mold
- Neutralisation of spores
- Eradication of pathogens due to antibacterial and anti-viral effects
- Purification of air and neutralisation of odors (odors and noxious gases are oxidised into harmless substances)
- Reduction of VOC (Volatile Organic Compound) emissions
